## TO WHOM IT MAY CONCERN

I am writing to enthusiastically recommend Andy's Professional Services as an outstanding source for lawn care and/or snow removal services.

Forest Vale West Condo Association has contracted with Andy's for landscape maintenance and snow removal for the ten years of my being responsible for managing grounds care for the association. The association consists of 22 quality-built brick buildings sitting on city property with well-manicured lawns and heavily wooded lots.

Andy's maintains the association's lawns, planting areas, sprinkler systems, and provides snow removal. They provide services such as spring and fall cleanup, lawn fertilization and weed control, aeration, edging, plant bed mulch, plant bed weeding, shrub trimming, sprinkler system testing and maintenance, and other services.

The company efficiently meets all contract obligations and performs services in a quality and timely manner. Non-contract jobs are estimated and satisfactorily performed. Amy Gehrke is always on top of routine, as well as special services. That is very important to me...so much so, that if the association did not contract specifically with Andy's, I would be reluctant to serve as the person in charge of grounds maintenance.

Andy's is always ready to meet the association's needs. Should any request or problem arise, it receives immediate attention by Amy or her staff. I highly recommend Andy's as a provider of lawn and snow removal services.

Sincerely,

Jim Horn  
Grounds Chairman,  
Board of Managers
